William established the Kintone's Global Developer Advocate team and is passionate about VR!

Other Engineering Positions

Technical Engineer

TECHNICAL ENGINEERING DIVISION

This division provides technical support to our partner firms with everything from servers, networks, databases, backups, and integrations.

Technical Engineering is a great role for those who want to work with backend technologies, stress test our products & client setup, and work as a bridge between the Tokyo & US offices.

Developer Tools Engineer

SYSTEM DEVELOPMENT DIVISION

This division creates tools that external developers use to build integrations and customizations on Cybozu's products. They oversee our products' various SDKs such as `js-sdk`, & `kintone-ui-component`.

Developer Tools Engineering is a great role for those who want to build everything from VS Code extensions to CLI tools.
